

# PRETTY PLEASE

Pretty please don't go  
Somewhere I can't follow

We come no closer than this  
And now you won't even kiss me  
Like you used to  
Be what you used to  
Be what you used to  
Be what it used to  
Be when we were

Don't disappear this thunder's for two  
Don't leave me here alone under you

Now you won't look in my eyes  
You know how my body cries  
Out for you just to see for your touch to  
Be what it used to  
Be what it used to  
Be what you used to  
Be when we were

A favorite child of love's  
Nobody moved like us

So quick now it's over and done  
You're through I've hardly begun  
See what you've done to me  
I'm reduced to be what you used to  
Be what you used to be for you just to see  
For your touch to be what it used to  
Be what it used to be what it used to  
Be what it used to be when we were

Pretty please  
Don't go
